

CareHarmony Secures Series A Financing Round Led by Nashville Capital Network

BRENTWOOD, TN (November 14, 2018) -- CareHarmony, a leading provider of population health and care coordination software and services to health care organizations, today announced it has secured Series A funding led by Nashville Capital Network (NCN). Participating with NCN are several prominent local health care executives, including Kirk Stanley, who will join the board of the company alongside Chase Perry from NCN. The funding will help fuel CareHarmony's rapid growth as well as broaden and accelerate product development.

The Series A financing builds on an exceptional year for CareHarmony, which saw a rapidly growing roster of clients and strong market momentum in value-based care. CareHarmony partners with some of the nation's most forward-thinking health care organizations to deliver high-touch, whole-person patient care that extends the reach of providers well beyond the four walls of the practice. While CareHarmony serves provider organizations of all sizes and specialties, its growth has largely been fueled by demand from accountable care organizations, health systems, and hospitals.

"CareHarmony is uniquely positioned to revolutionize the way in which health care organizations deploy population health programs," said Chase Perry, Managing Partner, Nashville Capital Network. "CareHarmony has impressive traction, including large health systems and national brands. This financing provides CareHarmony with resources that will empower them to accelerate growth and expand their offerings to health care providers."

Increasingly, health care providers and risk-bearing entities are turning to alternative care delivery models to better manage the health of populations and individuals. By partnering with CareHarmony, these organizations are able to quickly implement large-scale preventive and ongoing care programs without placing significant capital at risk. Working as an extension of the provider, CareHarmony implements a series of programs sponsored by the Centers for Medicare & Medicaid Services (CMS), including Chronic Care Management, Transitional Care Management, and Annual Wellness Visits.

"We are excited to welcome NCN, and its affiliated partners, as new investors. Having the financial and strategic support of investors like NCN fuels our momentum as a company and helps establish us as the innovative market leader in the space," said Gokul Mohan, CEO, CareHarmony. "Today, we are one step closer to forever changing the way care is delivered for the chronically ill."

About CareHarmony

Founded in 2015, CareHarmony is one of the fastest growing providers of software and services for chronic disease management. By combining the latest innovations in population health with 24/7 care coordination services, CareHarmony is able to offer complete "turnkey" care coordination programs that bend the cost curve while providing patients with new heights of care.
